## PROFESSIONAL SUMMARY

Software Engineering student specializing in MERN Stack, Java, and Generative AI with hands-on experience building full-stack web applications. Strong foundation in Data Structures & Algorithms, REST APIs, and secure authentication. Passionate about developing scalable software solutions and continuously learning modern technologies.

## EDUCATION

### B.Tech – Artificial Intelligence & Machine Learning

Mohan Babu University | CGPA: 9.2/10.0 | 2023–2027

## TECHNICAL SKILLS

**Languages:** Java, JavaScript (ES6+)

**Frontend:** React.js, HTML5, CSS3

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication

**Databases:** MongoDB, MySQL

**AI & GenAI:** Prompt Engineering, RAG, Embeddings, Vector Databases, AI Agents

**Testing & Tools:** Postman, Git, GitHub, VS Code, Thunder Client, MongoDB Atlas, Eclipse

**Core Concepts:** Data Structures & Algorithms, OOP, MVC Architecture

**Deployment:** Vercel, Render

## PROFESSIONAL EXPERIENCE

### Infosys Springboard Virtual Internship — Java Full Stack Track | July – August 2026

- Worked in a collaborative team environment, contributing to group discussions and aligning on shared technical decisions.
- Practiced effective teamwork by adapting to and following agreed-upon team decisions during project development (FarmVerse — see Projects).
- Strengthened full-stack development skills through structured, project-based learning on the Java Full Stack track.

## PROJECTS

### GrindPath | Personalized Learning & Productivity Platform

*Tech Stack: React.js, Vite, Node.js, Express.js, MongoDB, JWT*

- Developed a full-stack MERN application focused on productivity, goal tracking, and learning consistency.
- Implemented JWT-based authentication and authorization with protected routes.
- Built roadmap generation, progress tracking, dashboard analytics, and goal management features.
- Integrated frontend and backend modules using RESTful APIs and MongoDB.

**Live Demo:** <https://grind-path.vercel.app/>

**GitHub:** <https://github.com/Koushal0000/GrindPath>

### FarmVerse | Precision Agriculture Management Platform (Team Project – Infosys Springboard)

*Tech Stack: Java, Spring Boot, React.js, MySQL, REST APIs, JWT Authentication*

- Collaborated in a team to build a full-stack agriculture management platform for farmers to manage farms, crops, irrigation schedules, and fertilizer records.
- Built responsive, user-friendly UI in React.js, ensuring seamless navigation across multiple modules.
- Contributed to frontend integration with JWT-secured REST APIs for role-based access.
- Used Git and GitHub for version control and collaborative feature development.

## CERTIFICATIONS

- ServiceNow Virtual Internship Program – ServiceNow University, AICTE & SmartBridge
- Programming Using Java – Infosys Springboard
- Generative AI Certificate – Google Cloud

## CODING PROFILES & ACHIEVEMENTS

- Solved 130+ DSA problems on LeetCode.
- Regular participant in LeetCode Weekly Contests to improve logical thinking and problem-solving.
- Active learner on GeeksforGeeks, focusing on DSA and interview preparation.
- Built and maintained full-stack development projects using MERN Stack technologies.
- Earned the 50 Days LeetCode Badge.
- Vibe With India 2.0 Hackathon – Collaborated with a team to develop an innovative software solution.
